

## **Exercise 1 Using Keywords**

There was a size 8.5 earthquake and an eruption of a volcano. Pressure under the ground built up before being suddenly released. Rocks rained down from the sky when the volcano exploded. Lava flowed from the top and destroyed everything in its path. Roads and buildings were damaged. Luckily not many were hurt. There are a number of settlements now at risk of future eruptions.

### **KEYWORDS TO USE WHEN RE-WRITE THE PIECE**

**Magnitude Lithosphere Richter Scale Tephra Molten  
Infrastructure Casualties Fatalities Crater Vulnerable  
Mount Ontake (Japan) August 9th**
